

Safety Radar is revolutionizing the way organizations manage operational risks to keep people, assets, and reputations safe. Our Live Risk Platform helps prevent job site accidents by collecting hazard information, analyzing it using the safety industry's smartest AI, and communicating actionable opportunities to mitigate the risk.

Learn More

THE PROBLEM

A workplace injury occurs every **6** seconds

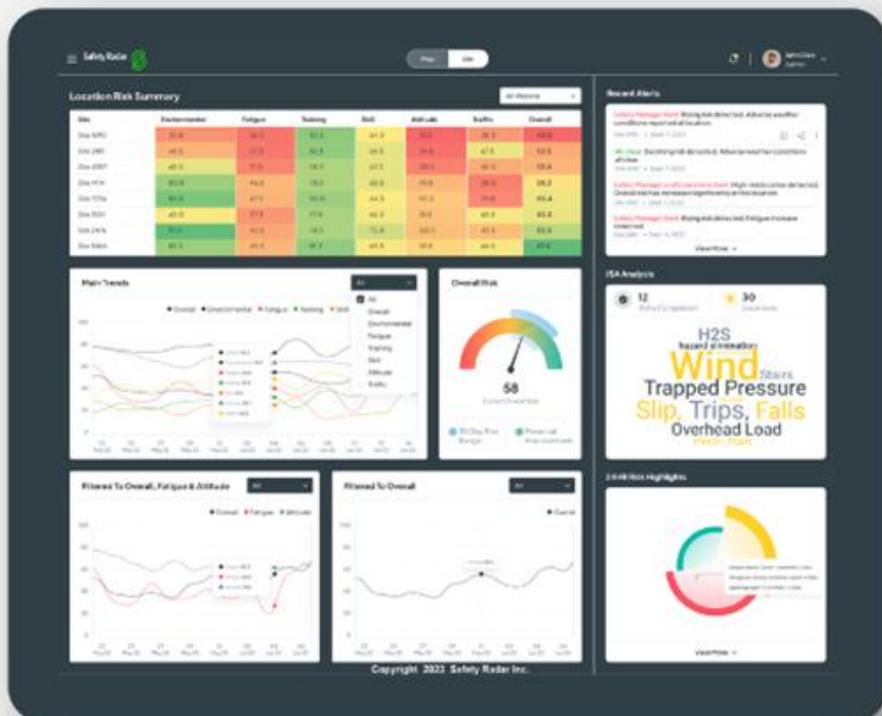

A workplace fatality occurs every **1.8** hours

Workplace accidents cost **\$164 Billion** per year

INCREASE ENGAGEMENT AND DECREASE ACCIDENTS

Collect information easily.

Use your company's current reporting system or deploy Safety Radar's incident and observation forms. Either way, Safety Radar's AI is ready to analyze the data to support your safety and operations team.

Analyze quickly.

Safety Radar's AI analyzes information 24/7/365, and it's trained on your company processes and procedures, historical records, industrial trade group information, and publicly available datasets.

Communicate effectively.

Our insights are easy to understand and helpful for everyone. Once risks have been analyzed, insights populate in the dashboard so your team can take *action* to keep people alive and safe.
